**Subject:** Grazing Allotments DEIS

Dear Broads and Friends,

Please protect threatened Oregon spotted frogs and their habitats, groundwater dependent peatlands (fens), and other valuable resources in the Antelope Grazing Allotments Project within the Walker Rim Groundwater Dependent Ecosystems area of northern Klamath.

- I don't support livestock grazing of Oregon spotted frog habitat.
- I don't support livestock grazing of fens.
- Please designate the Walker Rim Groundwater Dependent Ecosystems area as a unique management area where viable habitats for sensitive and threatened species, public enjoyment and education, research, and the development of appropriate management standards are the highest priority.

Thank you  
Amy Wheat
